**Maple Minerals Corp.**  
**Notes to Financial Statements**  
**March 31, 2002**  
**(Unaudited)**

---

**1. Basis of preparation:**

Maple Minerals Corp. ("Maple" or the "Company") is in the process of exploring its mineral properties and has not as yet determined whether these properties contain reserves that are economically recoverable. The recoverability of the amounts shown for mineral properties is dependent upon: the existence of economically recoverable reserves; the ability of the Company to obtain the necessary financing to complete exploration and development; and upon future profitable production or proceeds from disposition of such properties.

The financial statements have been prepared on the basis of a going concern, which contemplates the Company will be able to realize assets and discharge liabilities in the normal course of business. The Company's ability to continue as a going concern is dependent upon obtaining sufficient financing to meet its obligation with respect to operating expenditures and with respect to expenditures required on its mineral properties.

Although the resolution of the above uncertainties is not assured, management is sufficiently confident that additional financing will be obtained, including option agreements with co-ventures, to meet the Company's requirements as to warrant presentation of these financial statements on a basis that assumes the Company will continue in operation.

**2. Significant accounting policies:**

Management has prepared the financial statements of Maple in accordance with Canadian generally accepted accounting principles for interim financial reporting. Accordingly, they do not include all of the information and notes required by Canadian generally accepted accounting principles for annual financial statements. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, considered necessary for a fair presentation have been included. The following information should be read in conjunction with the annual financial statements and notes as at September 30, 2001. Accounting policies followed in the preparation of the annual financial statements are consistent with those used in the preparation of the March 31, 2002 interim financial statements except for the following:

(a) Basic and Diluted number of shares:

Effective on November 9, 2001, the Company consolidated its shares on a 3:1 basis and as a result, total shares issued and outstanding upon consolidation was 3,842,685. Prior periods' basic and diluted number of shares has been adjusted to reflect the consolidation of shares.

**3. Significant events:**

(a) During the six months ended March 31, 2002, 24 Quebec claims were terminated representing a write down of mineral properties and related expenditures of \$28,546 (December 31, 2000 – 103 Quebec claims terminated for write down of \$126,236).

(b) During the quarter ended March 31, 2002, the Company acquired 215 Ontario claim units for a total of \$18,158.

(c) On January 3, 2002, the Company issued 2,167,413 common shares at a deemed price of \$0.13 per share to settle \$281,764 of its advances from an affiliated company.
