

PRESS RELEASE

MEGA URANIUM LTD.: "MGA" (TSX-V)

FOR IMMEDIATE RELEASE: February 27, 2006

**HAMLIN DRILLING FINDS HIGH GRADE PHASE AND EXTENDS
COPPER-GOLD-SILVER-MOLYBDENUM ZONES
SHEBANDOWAN CAMP, THUNDER BAY, ONTARIO**

- **High Grade phase 0.88% Copper over 6.1m or 1.17% Copper equivalent in HAM06-43**
- **89m wide zone of 0.37% Copper equivalent in hole HAM06-43, including 6m of 0.83% Copper equivalent, and 11m of 0.41% copper equivalent**
- **52 m wide Copper zone in hole HAM05-32, located 250 m east of HAM06-43**

Toronto, Ontario, Canada, February 27, 2006 – Mega Uranium Ltd. ("Mega") (MGA-TSX-V) (through its Maple Minerals division) and East West Resource Corporation (TSX-V: EWR) are pleased to provide additional drilling results from its 50/50 jointly-owned Hamlin-Shebandowan property.

Hole HAM06-43 drilled in section with hole HAM06-39 (see February 14, 2006 press release) has located a higher grade copper zone with individual assays of 2.78% copper over 1m adjacent to 1.49% copper over 1m giving a 6.1m interval of 0.875% copper or 1.17% copper equivalent. This zone is adjacent to a chert magnetite marker seen in hole HAM05-33, which also yielded copper assays up to 1.55% in HAM05-33 and up to 2.22% in HAM06-39.

An 89 m zone in HAM06-43 extends from 15 – 104 meters with 0.37% copper equivalent, but contains 3 distinct zones from 52 – 58m (6m), 64 – 67m (11m) and 90.9-97m (6.1m).

HAM06-43

Copper equivalent is calculated using assumed metal prices of US \$1.80/lb Cu, US \$460/oz Au, US \$30.00/lb Mo, and US \$7.00/oz Ag, and is not adjusted for metallurgical recoveries, as these remain unknown. The formula used is as follows: Cu Eqv. (%) = [(Cu\$+Ag\$+Au\$+Mo\$)/1.8]/22. (500 ppm = 0.05 % = 1.0 lbs/ton)

Hole HAM05-32, completed in December 2005, was assayed in several sections over January and yielded 56m of 0.52% copper equivalent with zones of 5m of 0.82% copper equivalent (13.5 – 18.5m) and 7 m of 0.48% copper equivalent (20.5 – 27.5m).

This hole is located on line 7E, 800m east of the west end of the trenching. This hole not only showed the consistency of the mineralization, but confirmed that the main zone tracks the volcanic contact on the north margin of the breccia and produces continuous grades with similar averages. The known copper zone is now confirmed over an 800 m length (line 1W – 7E). Further drilling to test continuity is underway and expected to be completed by the end of October.

Basemetal and silver values (Copper, Silver, Molybdenum) were determined by ICP induced coupled plasma) after an aqua regia acid digestion. Gold values were determined by fire assay extraction on 30 gram samples followed by an AA finish. Assays exceeding 10,000 parts per million copper were repeated using multi acid digestion and atomic absorption (AA). Check assays were run on high values. Blind standards were inserted approximately every 40 samples. Preparation of the samples outlined in this news release were carried out by ALS Chemex in Thunder Bay and assaying was carried out by ALS Chemex in North Vancouver.

The project set out above is being supervised by R. Middleton, P.Eng. who is the Qualified Person and the person responsible for quality control of the assaying and reporting.

Mega Uranium Ltd. is a Toronto-based mineral resources company with a focus on uranium properties in Australia, Argentina, Mongolia and Canada. Through Mega's Maple Minerals division, Mega and its partners are exploring other base-metal properties in Northern Ontario and Africa. Further information on Mega can be found on the company's website at www.megauranium.com

This news release contains forward-looking statements within the meaning of the "safe harbour" provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are subject to risks and uncertainties and other factors that may cause Mega's results to differ materially from expectations. These include risks relating to market fluctuations, property performance and other risks. These forward-looking statements speak only as of the date hereof. Mega Uranium disclaims any intent or obligation to update these forward-looking statements and cautions investors from placing undue reliance on forward-looking statements. Mega does have an ongoing obligation to disclose material information as it becomes available.
